

Lissa Sugeng, MD, MPH, FACC, FASE, is Associate Professor of Medicine in Cardiovascular Imaging (Echocardiography) at Yale University in New Haven, Connecticut. Dr. Sugeng is a distinguished clinician, researcher, educator, and administrator in cardiovascular disease. She is Medical Director at Yale New Haven Health System Echolab Quality and Standards, Director of Yale Echolab, and Associate Director of the Echolab, Director of Echolab Research, Director of the Echo Corelab at Yale Cardiovascular Research Group.

Dr. Sugeng has expertise in echocardiography specifically, Three-Dimensional Echocardiography and the use of 3D echo in structural heart disease. Her professional interests are primarily devoted to validation of 3D technology to measure ventricular volume and ejection fraction and valvular dimensions; understanding how to apply 3DE in routine clinical echocardiography, interventional echocardiography, electrophysiology procedures and valvular surgery, and; Clinical trial research in the Echo Core Lab (YCRG).

Dr. Sugeng earned her MD at Udayana University in Bali, Indonesia, and she earned her MPH in Public Health at Boston University in Boston, Massachusetts. Dr. Sugeng completed her residency at University of Massachusetts Medical Center, and she completed her fellowship in Cardiology and Echocardiography at University of Chicago in Chicago, Illinois.

Dr. Sugeng is the author or coauthor of articles and abstracts, which are published in prestigious, peer-reviewed scientific journals including American Journal of Physiology, Circulation, Journal Of The American College Of Cardiology, and Journal of the American Society Of Echocardiography. Dr. Sugeng is a recipient of the Yale University 2011 Cardiology Teaching Award and the University of Chicago 2008 Rory Childers Teaching Award.
