

Rebecca T. Hahn, MD, FACC, FESC, FASE

Rebecca T. Hahn, MD, FACC, FESC, FASE, has expertise in valvular heart disease and echocardiography. Her professional interests are primarily devoted to structural heart disease interventions and valvular heart disease, particularly as these relate to imaging.

Dr. Hahn earned her BS in biological sciences at Harvard University in Cambridge, Massachusetts, and she earned her MD at Washington University in St. Louis. Dr. Hahn completed her residency and cardiology fellowship at The New York Presbyterian Hospital, Weill-Cornell University Medical Center in New York City. She is board certified in internal medicine, cardiovascular disease, and echocardiography. She is Professor of Medicine at Columbia University Medical Center and Director of Interventional Echocardiography at the Structural and Valve Center.

Dr. Hahn has delivered national and international invited presentations at the scientific session of the ACC, ASE, ESC, EACVI and others. She is the author or coauthor of more than 250 articles primarily related to structural heart disease interventions and valvular heart disease. She is a co-author on 4 American Society of Echocardiography Guidelines and numerous Academic Research Consortium (ARC) documents.
